

Project Profile

Amazing Facts
Granite Bay, CA

System Features

Amazing Facts is a worldwide ministry, including a local church, radio, television and publishing house. This project includes extensive AV solutions in their new administration, sanctuary and broadcast facilities.

- Broadcast - 4K/UHD TV studio, complete with 4K studio camera rigs, studio lighting, video and audio switching, audio editing suite. A fiber network is used to tie all buildings and systems together on one high-speed platform.
- Sanctuary – Line array speaker system, digital mixing consoles on a digital audio network, LED theatrical lighting, video presentation switching for IMAG and redundant on-air video broadcast control room.
