

Project Profile

St. Thomas' Episcopal Church
Houston, TX

System Features

St. Thomas' Episcopal Church has been around for over 60 years -- from humble beginnings to their expansive growth today. Following the damage from Hurricane Harvey, the church sought to completely redo and upgrade both their audio and video systems in the sanctuary.

- Audio System | Steerable line array speakers throughout the hall to ensure all zones receive the best listening experience
- Production Booth | Audio and video control systems for live production needs
- Video System | PTZ camera system perfect for live-streaming and recording purposes in main sanctuary hall
