

Project Profile

Louisiana State Legislature
Baton Rouge, Louisiana

System Features

Ford AV completed a comprehensive AV renovation at the Louisiana State Legislature Building, integrating advanced technology to enhance legislative communication, promote public accessibility, and improve efficiency.

- **Audio Systems** | Over 280 speakers were strategically deployed, including low-profile ceiling speakers, ensuring even sound distribution throughout the space
- **Video Systems** | More than 200 digital displays were replaced, providing viewers with a high-definition experience
- **Conference Systems** | Individual conferencing stations, each with a microphone, built-in speaker, and 10" touch panel, were installed for delegates, as well as witness tables and the chairman's dais
