

# Project Profile

Northwest Arkansas Regional Airport  
Bentonville, AR

## System Features

Built in 1998 to facilitate the rapid growth in northwest Arkansas, Northwest Arkansas Regional Airport hosts over 1 million passengers each year. In 2010, the airport completed construction of a new concourse that added 51,000 SF to the facility. Ford AV was hired to integrate a new system into the airport to accommodate future needs.

- **Sound System** | Ambient noise sensors relay real-time information to the system so that accurate output levels can be determined while making announcements in high-traffic areas
- **Video System** | HD displays provide information and updates to passengers and touchscreen monitors reduce clutter while maximizing space, offering an all-in-one product and reducing equipment

## Participants

### Owner

Northwest Arkansas Regional Airport Authority

### AV Contractor

Ford Audio-Video Systems
