

Project Profile

Presbyterian Health Simulation Center
Albuquerque, NM

System Features

Presbyterian Health Simulation Center is New Mexico's largest simulation facility for healthcare training. The medical facility's AV systems provide the ultimate experience for medical training in a controlled environment.

- **Sound System** | Includes 2-way ceiling speakers for sound reinforcement, wireless microphone combo systems for flexibility, and networked ceiling speakers for overhead paging and sound effects
- **Video System** | Features 75" 4K flat panel displays, motorized projection screens and ceiling-mounted PTZ cameras for event capture
- **Control System** | Managed by 10" wired touch panels for seamless system operation
